In Australia, the food processing area must follow sanitary, safety and quality regulations for the staffs and employers. Epoxy Flooring Sydney ensures that wherever hygiene is of importance, safe and secure epoxy or polyurethane products are used to keep the floor free from bacteria preventing food contamination.

Hygiene Epoxy Coating Safeguards The Floor From:

- Getting contaminated during any task
- Chemical resistance allowing easy cleaning
- Prevent mould and fungal growth
- Easy maintenance

We at Epoxy Flooring Sydney, use antibacterial and food safe epoxy and confirm that these products are seamless, has great resistance to cleaning chemicals and is hygienic.

The Types Of Products We Use For Food Processing Area Is:

- Polyurethane Coating: this hygienic coating not only decorates the floor but also is easy to clean. Has less abrasion and most of all is chemical resistant.
- Epoxy Coating: Epoxy is considered to be the most durable of all and a hygienic solution for food processing area. Together with chemical wash, pressure wash can also be used to clean the epoxy coated floor.

Believe me, we have got your covered.

So, what is Food Safe Epoxy?

Food safe epoxy is raw material in adhesives that is suitable for use in the food industry. It provides excellent resistance to food, water, heat and cleaning chemicals. These chemicals are perfect for alignment and is cured easily by heat.

Epoxy Flooring Sydney ensures that all their products are hygienic, durable and safe flooring system. Our products are chemical resistant, shock resistance, durable, withstands impact from heavy vehicles and machinery. All products used by Epoxy Flooring Sydney is anti-slip, easy to clean and most of all is functional.

Advantage Of Using Food Safe Epoxy

- Anti-Bacterial
- Easy to clean
- Resistant to chemicals
- Resistant to Thermal shock

- Tolerates wide range of temperatures
 - Slip resistance
 - Stain proof
 - Non absorbent

Why Epoxy Coating Food Processing Area Is Important

Food processing area must always follow the strict government standards. This is because there is certain food that contains hazardous materials and if managed improperly can lead to unwanted penalties from the government. For this reason, many restaurants and food chains make sure that the safety measures are met ensuring that sanitary procedures become an essential part of their business.

Some food bioproducts such as sugar, acids, oil and fats are meant to be present or fall on the food processing area floors making it dangerous for its users. It is very important that the floors, indoors and outdoors are always kept clean. To ensure that the safety procedures are met, health department has regular inspections.

Epoxy Flooring Sydney has been applying epoxy floor coating system all over Sydney in the food processing area. These floor coatings prevent mess and protects the floor. Epoxy coated floor is also easy to clean, making work easier for cleaners and gives a long life to the floor reducing floor maintenance cost.

Apart from the above-mentioned benefits, Epoxy floor coating is now been used in the food industry frequently. For one, it provides protection against harmful acids. Epoxy Coated floors also has excellent bonding capabilities and tolerates tough cleaning chemicals and procedures. Since cleanliness is the key factor in all food processing industry, epoxy coated floors have shown a lot of success on keeping the work area spotless and safe. Safe because the floors become anti slip allowing quick and easy movement and almost no safety issues.

There are other benefits of having epoxy floors from this external article and might help you decide better.

Requirements

There are few requirements to be met once any project is approved to proceed. We prefer the project area is cleared, cleaned free from debris. Cars and traffic to be removed to ease work. Our staff also work around the clock to get any project completed making the garage available for our clients at the earliest.

Warranty

One-year workmanship warranty is given against peeling and delamination. Moisture related and negligent issues is not covered by warranty. Manufacturer certificate could be offered if it has been mentioned prior to start as manufacture representative has to assess the project to be able to issue the necessary certification. We do not offer warranty for substrate failure such as cracking od floors, shifting or crumbling of the concrete.

Occupational Health and Safety

As part of our commitment to achieving the principles of health and safety in workplace, Epoxy Flooring Sydney, recognizes its moral and legal responsibility to provide a safe and healthy work environment for its employees, contractors, customers and visitors. This commitment also extends to ensuring that our operations do not place the local community or environment at risk of injury, illness or damage. Furthermore, we also declare a no smoking zone due to the material used.
